### **California Water Environment Association recognizes MCWD Employee** *Rob Motley recognized as 2017 Electrical/Instrumentation Person of the Year*

The Mammoth Community Water District's Robert Motley, Plant Maintenance/Instrumentation Supervisor, is being recognized by California Water Environment Association (CWEA) as the 2017 Electrical/Instrumentation Person of the Year.

Clay Murray, Operations Superintendent, nominated Rob Motley for the award in October. "Rob is one of those guys that just solves problems and gets things done. Rob's commitment to excellence is what makes him an All-Star and why we are lucky to have him on our team. It's an honor to have one of our staff be recognized by the Sierra Section of the CWEA and I can't think of anyone more deserving than Rob Motley."

Rob started with the MCWD as a contract employee in 2001 and became full time in 2009. The Plant Maintenance Department, which Rob supervises, is responsible for the maintenance and repair of all electrical equipment including automated industrial control systems, pump motors, industrial communication systems, water and wastewater treatment plant equipment, and general building maintenance.

"Rob enjoys and takes pride in improving the infrastructure of MCWD facilities; he has a knack for understanding where upgrades are needed throughout the system and how to implement them. I enjoy coming to work every day, a big part of that is because of his influence, depth of knowledge, and willingness to share it with the rest of us," stated by Keith Weiland who has worked for Rob for over nine years.

Rob's excellence will be recognized by the CWEA Sierra Section at the Installation and Awards Banquet on February 17, 2018 at the Tamarack Junction in South Reno.
