FOR IMMEDIATE RELEASE: February 3, 2025

CONTACT: Michael Draper, Regulatory Services Division

The Mammoth Community Water District Reinforces Commitment to Reliable Water Service and Support for the Town of Mammoth Lakes in the Event of a Wildland Fire Emergency.

Mammoth Lakes, California –

The Mammoth Community Water District continues to uphold its essential role in providing efficient water and wastewater services to the residents, businesses, and visitors of Mammoth Lakes. The District maintains a reliable and resilient water distribution and sewer collection system, ensuring that the community's water and wastewater needs are met year-round.

The District's water distribution system is designed to support the diverse needs of both residential and commercial customers, which covers everyday use, peak demand periods, and supporting firefighting efforts. As part of its ongoing commitment to sustainability and providing excellent service, the District works diligently to provide clean, safe drinking water by continually fortifying its infrastructure and assets. Through proactive maintenance, regular upgrades, and strategic long-range planning, the District continues to adapt to the changing needs of the community while minimizing any potential service interruptions.

The District regularly collaborates with the Mammoth Lakes Fire Department to ensure the water distribution system is available to support firefighting efforts in or around the community. The District's infrastructure is strategically designed to meet water demands during fire emergencies, and the team works closely with fire officials to ensure that the system meets their needs.

In the event of an emergency, the District advises customers to limit water use when possible. This will help ensure that the distribution system continues to function as designed, and all resources can be directed where most needed to respond to the situation at hand.

For more information about the Mammoth Community Water District and its services, or to learn more about water conservation and emergency preparedness, please visit mcwd.dst.ca.us, or contact Michael Draper, Principal Administrative Analyst of the Regulatory Service Division, 760-934-2596 ext. 274, or mdraper@mcwd.dst.ca.us.

###

MCWD provides water and wastewater utility service to the Town of Mammoth Lakes and surrounding areas. MCWD strives to provide reliable, affordable utility service to our customers and to conduct our operations in a manner reflecting our stewardship role. We encourage our customers to practice responsible use of our limited water resources, and to take advantage of the information and services available to support this goal.
